Web developer with experience in HTML, CSS, JS, and React.js. Highly motivated and dedicated to delivering high-quality work. Bachelor in Business Administration with experience in administration, finance, and customer service. Curious, with exceptional oral and written communication skills, and always eager to learn.

Technical Skills

HTML, JavaScript, React.js, Java, Spring Boot, CSS, Tailwind, Framer Motion, NodeJS, PostgreSQL, Sequelize, Redux, Canva, and GIT.

Projects

Web developer portfolio
Developed my personal Web Developer portfolio using React.js, CSS and JavaScript. It has responsive-mode, and I used some Particles.js Library to create a unique background.

Pokemon App
Created a project using React, Redux, and Express in the Front-End, and PostgreSQL and Sequelize in the Back-End. The project was part of the Bootcamp at Soy Henry.
The app allows the user to search and filter pokemons and to create a new Pokemon.

Groove tickets
Collaborated with a team to develop an event ticketing application created during the Fullstack Developer Bootcamp at soyhenry.com. I was responsible for implementing features using JavaScript, React.js, Redux, and Material UI. I was also responsible to create the responsive mode.

API Countries
Developed an API that returns the countries of the world using javascript, HTML and CSS.
I included responsive design and dark mode.
